

HERZING UNIVERSITY

Articulation Agreement

Introduction

This Articulation Agreement (the "Agreement") is entered into between **BIR Training Center** (the "Sending Institution") and **Herzing University**, (the "Receiving Institution"), to facilitate the process for the transfer of credit between the institutions, continuation of student educational progress toward the completion of an approved degree program and to minimize or avoid the loss of credit previously earned by a student who transfers to another institution. The Agreement acknowledges that each institution has established, and will maintain, rigorous standards and expectations for all students enrolled in and working toward the completion of its courses, programs, certificates, diplomas and/or degrees.

This Agreement formally recognizes that the Sending Institution and the Receiving Institution are educational institutions that agree to work together to preserve integrity and to further enhance the quality of each institution's academic offerings to currently enrolled and prospective students. The development of this Agreement between the two institutions signifies that both have extensively reviewed the other and confirmed that:

- Credits awarded by the institutions have been evaluated and determined to be eligible for transfer; and
- Credits earned in certain diploma, certificate or associate's degree programs of study (the "Transfer Programs") have been deemed appropriate and applicable to the destination bachelor's degree program(s) of study reflected in this Agreement. Mapping for each Transfer Program and the destination program are attached as **Exhibits A-F**.

This Agreement reflects a commitment by both institutions to facilitate the transfer of credits into a baccalaureate degree program without jeopardizing the intended mission and stated goals of either institution.

Terms

HERZING UNIVERSITY

As a result of an assessment of the Transfer Programs and destination baccalaureate programs by both institutions, it has been determined that all credit earned in the Transfer Programs awarded by the Sending Institution will transfer to the Receiving Institution subject to the following conditions:

- Although credits will be accepted in transfer, additional general education and lower division credits may be needed to fulfill the program requirements. For example, applied General Education courses do not satisfy the General Education requirements of an academic degree program;
- Students from the Sending Institution will be granted admission to a baccalaureate degree program at the Receiving Institution as a result of having completed a Transfer Program with a cumulative grade point average of 2.0 or greater and upon further satisfaction of all other conditions for admission as stated in the Receiving Institution catalog. Transfer students who have completed an associate degree will not be required to take a placement test. Students who have not yet completed an associate degree and who have not yet completed the associate level English and math classes will be required to take the placement test. The admission requirements of the Receiving Institution may be viewed at www.herzing.edu. Students from the Sending Institution may pre-apply to the baccalaureate program at the Receiving Institution. Pre-application is defined as the process of submitting an admissions application and official transcript to the Receiving Institution prior to the completion of an associate degree at the Sending Institution.
- The application fee shall be waived for all transfer students, regardless of whether they have earned an associate degree or simply credits toward that degree.
- All courses taken at the Sending Institution with grades "D" or better *as part of a conferred associate degree* will be accepted for credit by the Receiving Institution. In the event that the Receiving Institution has specific grade requirements for core courses in the associate degree program, the transfer student may be required to repeat a course in the associate degree program to satisfy that requirement. Transcripts of transfer students who have not yet completed an associate degree program at the Sending Institution will be subject to a course by course evaluation to determine which courses will be accepted for credit by the Receiving Institution.

HERZING UNIVERSITY

- Regardless of the number of credits accepted, at least 25% of the credits for the baccalaureate degree must be completed at the Receiving Institution.

The policies for awarding credit by examination and experiential learning vary from one institution to another. Each institution will publish information about its policies for awarding credit for experiential learning, including the names of tests that are used to assess credit, cut-off scores, deadline dates for submission of scores to the Receiving Institution, and restrictions on the time interval permitted to receive current credit for a course taken some years previously. Any credit awarded by the Sending Institution for experiential learning *as part of a conferred associate degree* will be accepted for credit by the Receiving Institution. Transcripts of transfer students who have not yet completed an associate degree program at the Sending Institution will be subject to a course by course evaluation to determine which courses will be accepted for credit by the Receiving Institution. In this instance, the Receiving Institution will make the determination as to whether credit will be awarded for experiential learning.

Determination of course requirements of the major for a baccalaureate degree, including introductory and related courses, is the prerogative of the Receiving Institution. The catalog of the Receiving Institution will clearly state the requirements for each baccalaureate degree program. When specific prerequisites are required, they will be designated and noted in conjunction with the course description. Transfer students who have completed prerequisites will not be required to duplicate study in the area. The catalog will specify any restrictions or additional requirements for each program of study.

Institutional policies that distinguish between upper- and lower-division courses may vary at each Receiving Institution. The variation results in similar courses being identified as upper or lower division at different institutions. This can create redundancy in the curriculum of a transfer student (i.e., repeating an upper division course at the receiving institution when the student had completed a course with the same content and learning objectives but labeled as lower division by the sending institution). Receiving Institutions should attempt to avoid course duplication by transfer students by requiring the completion of a related but non-duplicative upper-division course that would enrich the curriculum of the student if permitted in the program structure through the use of electives.

HERZING UNIVERSITY

Additional Terms

Both parties agree to notify each other of any adverse changes in its accreditation or state licensure status.

Any written materials published and distributed by either the Sending Institution or the Receiving Institution that reference this Agreement or a relationship between the Sending and Receiving Institutions must be approved by each respective party, and their regulatory agencies as required, prior to use.

Transfer literature will be updated on an annual basis as a result of a mutual review process.

No financial implications concerning the transfer or exchange of cash, equipment, or real estate are intended or implied by this Agreement. The Sending Institution and the Receiving Institution are separate and independent institutions of higher education.

All courses taken at the Sending Institution with grades "D" or better *as part of a conferred associate degree* will be accepted for credit by the Receiving Institution. In the event that the Receiving Institution has specific grade requirements for core courses in the associate degree program, the transfer student may be required to repeat a course in the associate degree program to satisfy that requirement. Transcripts of transfer students who have not yet completed an associate degree program at the Sending Institution will be subject to a course by course evaluation to determine which courses will be accepted for credit by the Receiving Institution.

All courses taken at the Sending Institution with a "P" earned in a pass/fail class *as part of a conferred associate degree* will be accepted for credit by the Receiving Institution. Transcripts of transfer students who have not yet completed an associate degree program at the Sending Institution will be subject to a course by course evaluation to determine which courses will be accepted for credit by the Receiving Institution.

Any credit awarded by the Sending Institution for credit by examination, dual credit, and/or experiential learning *as part of a conferred associate degree* will be accepted for credit by the Receiving Institution. Transcripts of transfer students who have not yet completed an associate degree program at the Sending Institution will be subject to a course by course evaluation to determine which courses will be accepted for credit by the Receiving Institution. In this instance, the Receiving Institution will make the determination as to whether credit will be awarded for credit by examination, dual credit, and/or experiential learning.

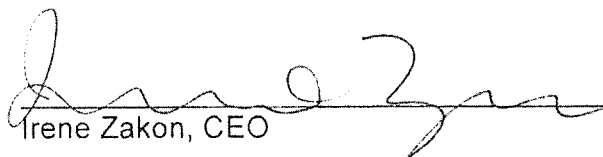

HERZING UNIVERSITY

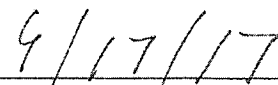

When a student initiates a change in the stated major or degree objectives after enrolling at the Receiving Institution, the student assumes full responsibility for meeting the specified new degree and/or major requirements. In particular, students who have completed a Transfer Program, or credits toward that credential, and then transfer out of the baccalaureate program covered by this Agreement should anticipate potentially significant changes in degree program completion requirements. The Receiving Institution therefore shall provide pre-transfer counseling to such students to alert them to the ramifications of this decision.

Terms of Agreement

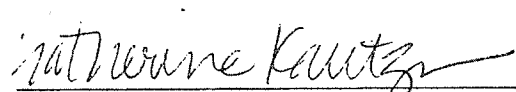

This agreement will be in effect for five years from the date of execution. Renewal of the agreement with appropriate content changes will be discussed at the end of this time period.

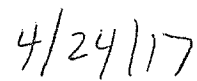

Termination of this agreement may occur by either party with a ninety (90) day written notification, or immediately if 1) the Sending or Receiving Institution loses state or accrediting agency approval, or 2) if any regulatory agency that oversees the Sending or Receiving Institution notifies either that this Agreement violates agency standards. Such termination will have no impact upon students that have already enrolled at the Receiving Institution. In the event of a termination of this Agreement, each institution will be responsible for amending any publications or websites as needed and for disposing of any brochures or related materials at their own physical locations.
